

I am writing in support of satellite radio and the current channels providing traffic and weather. I listen to these reports daily, as I travel throughout the country, and would be very unhappy if they were discontinued. I understand that NAB has a petition #04-160 , HR 4026 that would end this service. I urge you to vote against this petition and to support the increased, consistent availability of safety and weather information to the public on all venues!
